

The Innovative Solution to Prevent External Cash Trapping on Your ATMs

Protect your NCR SelfServ 80 Series ATMs with Bump-Bloc, a robust die-cast aluminium component designed for drive-up machines in the US.

Easy Application: Bump-Bloc uses advanced 3M bonding technology to attach securely to the external face of the ATM, eliminating the need for physical fixing.

Enhanced Security: Acts as a deterrent, making it difficult for criminals to fit long metal strips that capture cash.

Peace of Mind: A simple yet effective way to enhance the security of your machines and provide reassurance to your customers.

Benefits

- One box solution
- Fits to most NCR SelfServ 80 Series ATMs
- Installation time 10-20 minutes – installation video available
- No specialist tools required
- Minimal BAU impact
- Worldwide deployment

Accessibility

Bloc-Tab works on most SelfServ and 80 Series ATMs, and all major currencies.
